

SAVING YOUR OWN SEEDS

John (Ditchy) Ditchburn
Ballarat Community Garden

This will be a PowerPoint slide presentation covering a range of seed saving topics and based on my experiences of saving seeds for over thirty years. It is aimed at saving vegetable seeds but the methods talked about can also be applied to saving other types of seeds. Topics covered include:-

- The various pollination methods and levels of cross pollination of different vegetables.
- What plant varieties are the easiest to save seeds from.
- Seed storage life.
- Saving seeds using the dry method.
- Saving seeds using the wet method.
- Bag drying seeds.
- Labelling and storing seeds.
